Transitions from stationary to mobile with one step to allow for safe transport

3/4" wheel clearance without sacrificing the stability of the chair

Patented belt restraint system

Extremely durable
(many still in service for over 20 years)

Comes completely assembled and ready for use

removable
pad for
handcuffed
detainees

**MADE IN
USA**

lifted chair
turns
on casters

PRO-STRAINT RC1910

THE RC1910 SOLUTION

Added Circulation

At last, a way to exercise or medicate a detainee without them leaving the restraint chair. They can feed themselves while under full control of the monitoring officer. An ergonomic “pocket” for each leg provides greater control without sacrificing overall circulation. Well suited for the violent, mentally disturbed or substance influenced detainee, offering increased control and safety.

SOFT RESTRAINT SYSTEM

Restraint Levels

- 1 NO RANGE OF MOTION, UTILIZING REAR CAM BUCKLE ADJUSTMENTS**
- 2 PARTIAL RANGE OF MOTION, UTILIZING REAR CAM BUCKLE ADJUSTMENTS**
- 3 FULL RANGE OF MOTION, UTILIZING REAR CAM BUCKLE ADJUSTMENTS**

FULLY RESTRAINED,
utilizing recessed arm channels
for handcuffed detainees

optional
**HARD RESTRAINT
SYSTEM** provides an
additional level of security
