

INSTALLATION GUIDE

**2018+ DURANGO
P1000 OEM PRO-CELL
P1000DUR18AOEM**

Pro-gardTM
PRODUCTS LLC.

STRONG. RELIABLE. SECURE.

**THESE COMPONENTS ARE REQUIRED
TO INSTALL THE PRO-CELL OEM SYSTEM**

This system requires the barrier to be installed.

I. The following tools will be required to complete the installation

II. Read all instructions and refer to last page to ensure all parts were received

- | | | |
|------------------------------|--------------------------|----------------------------|
| A. 7/16, 9/16, & 3/8 Sockets | C. 15mm Deep Well Socket | E. 3/16", 5/16" Drill Bits |
| B. Phillips Screw Driver | D. 3/16 Allen Wrench | F. 1" Hole Saw |

NOTE: The Durango barrier must be installed along with the Outboard Seat Belt System.

WARNING: Locate All wiring, fuel lines, brake lines, coolant lines, or refrigerant lines before drilling any holes or installing any self-drilling fasteners.

III. Install Barrier (4B6702D18) per instructions provided

IV. Install Window Guard (WB67NPD18) per instructions provided.

V. Partition Installation—B-Pillar and Mounting Plate

A. Remove lower B-pillar trim.

B. Remove upper B-pillar trim.

C. B-pillar with trim removed.

D. Locate B-pillar bracket up against seat belt guide. Mark hole locations. Pre-drill using 3/16" drill bit.

E. Use paper template (last page) and mark and drill hole locations on B-pillar trim using 1" dia hole saw.

F. Re-install B-pillar trim and fasten mounting plate using (3X149) screws.

VI. Install Partition and Center Support.

A. With assistance, bolt partition to mounting plate as shown.

B. Prop up unsupported end as needed.

Note: partition will be just forward of the HVAC ceiling controls.

C. Install center support bracket (3PK6718-44) . Note: fasteners will be removed and re-fastened when installing divider.

D. Remove OEM bolt from driver side seat track.

E. Install center support floor bracket (3PK6718-41) and fasten to center support using OEM bolt and (2) [3X82] bolts and (2) [3X16Z] nuts.

VII. Install Seat Protector and Divider Brackets

A. Install seat protector (3SP6718-46) using (3X36) bolts and (3X16Z) nuts. The wrap-around flange will tuck behind the mounting plate.

B. Insert lower support bracket (3PK6718-42) between seat and seat back, rotating upward and against barrier. Fold seat back down. Mark and drill mounting hole locations through barrier. Fasten bracket using (3X03) bolts and (3X16Z) nuts.

C. Fasten divider barrier bracket (3PK6718-25) by replacing existing screw with (3X05A) as shown.

D. Sub-assembly vent to divider as shown.

VIII. Install Center Divider and Wings

A. Bring divider in through the passenger side, top first, angle to center, pivot to rear and slide against mounting surfaces.

B. At mounting points, mark hole locations and drill holes using 5/16" drill bit. Fasten divider using (3X82) bolts and (3X16Z) whiz nuts.

C. Locate top filler (3W6718-43) against ceiling and divider, then mark. Drill 5/16" mounting holes and fasten using (3X36) bolts and (3X16Z) whiz nuts.

D. Sub-assembly wing and install to partition per instructions found in wing kit (W6718PRO-OEM).

Installation complete

If you have any problems with this installation or have any questions please call (800-480-6680) and ask for technical assistance.
