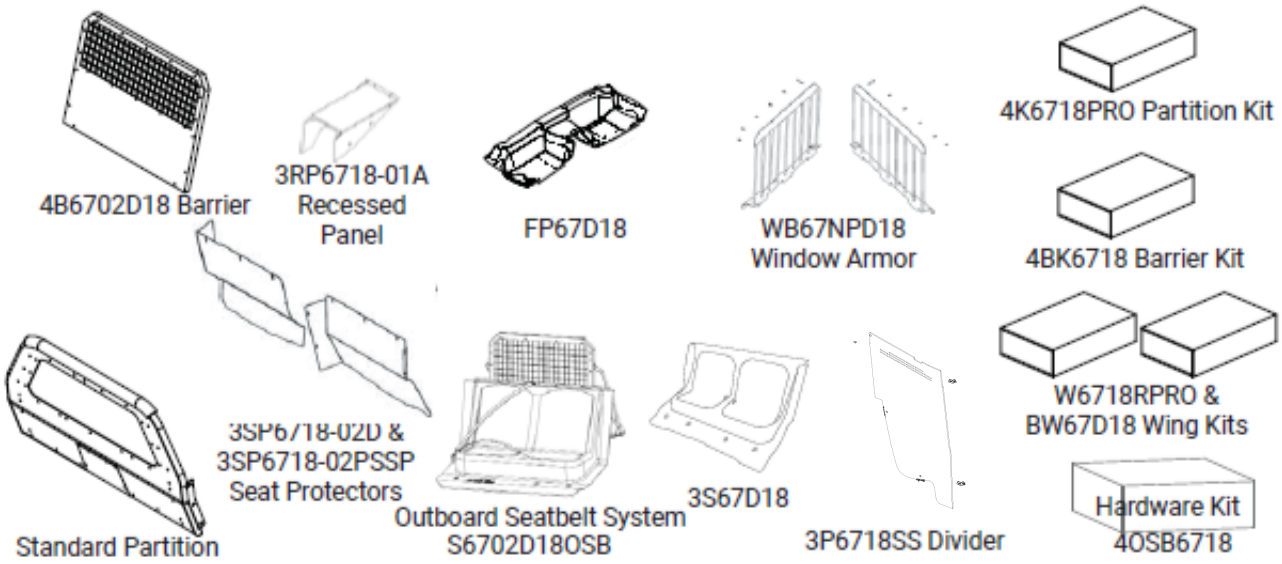
Released 4.28.2023

THESE COMPONENTS ARE REQUIRED

TO INSTALL THE PRO-GARD PARTITION SYSTEM



I. Refer to the diagram on the last page of these instructions to verify all parts were received.

II. The following tools will be required to complete the installation.

A. 1/4” drive ratchet with 7/16” socket

B. 3/8” drive ratchet and 6” extension with 15mm and 18mm socket

C. Drill with 5/16” diameter bit

D. Phillips Screw Driver

E. 11/16”, 9/16” and 3/4” sockets

F. T-45 Torx Bit

G. 3/16” Allen key

H. 1” Hole saw

I. Drill with 3/8” Socket

J. 7/16” End Wrench

K. 1/2” drill bit w/ drill

L. Saw

M. 5/32 Allen Wrench

III. Read all instructions carefully before starting the assembly process.

NOTE: *Locate all wiring, fuel lines, brake lines, coolant lines and refrigerant lines before drilling holes or installing self-drilling fasteners.*

NOTE: *The Durango barrier, outboard seat belt system and partition must be installed prior to P1826 divider installation.*

IV. **Install Partition (PSSP67XXD18A) per instructions**

V. **Install Cargo Barrier (4B6702D18) per instructions**

VI. **Install Outboard Seat Belt System (4OSB6718) per instructions**

A. Assemble up to belt installation.

VII. **Install Floor Pan (FP67D18) per instructions**

VIII. Temporary Seat & Divider Install to Locate Seat Brackets

A. Install the seat using enough fasteners to sufficiently locate and hold in place.

B. Fasten divider barrier bracket (3PK6718-25) at top of barrier as shown, by removing supplied bolt and replacing with longer kit bolt (3X05A). (Fig. 1)

C. Bring the divider in top first from the passenger side. Now slide the divider toward the center of vehicle and locate against the top barrier bracket just installed, Drill 5/16" and fasten using (3X61) bolt and (3X16Z) nut to hold in place for next step.

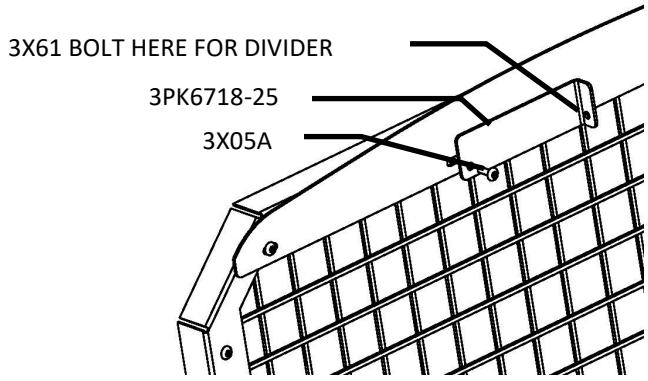


Fig. 1

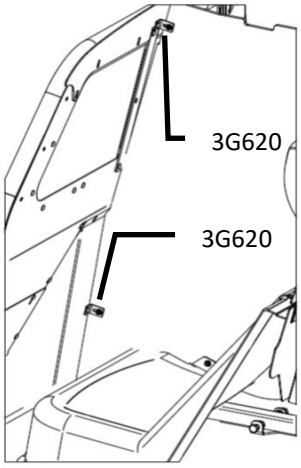

Fig. 2—DIVIDER PARTITION BRACKETS

D. Using angle bracket (3G620), locate against divider and partition and mark hole locations (Fig. 2). Bracket locations are approximate. Drill and fasten angle bracket to partition using (3X36) bolts and (3X16Z) nuts. Don't fasten divider until seat brackets are fastened.

F. Locate divider mounting brackets (3P214) with the two divider clearance notches at seat bottom and back. Flange will be toward the passenger side. Mark mounting hole locations on the seat and divider (Fig. 3).

G. Remove divider and seat and drill the marked hole locations on the seat.

H. Attach the (3P214) divider mounting brackets to the seat using (3X36) bolts and (3X16Z) whiz nuts. Now install seat.

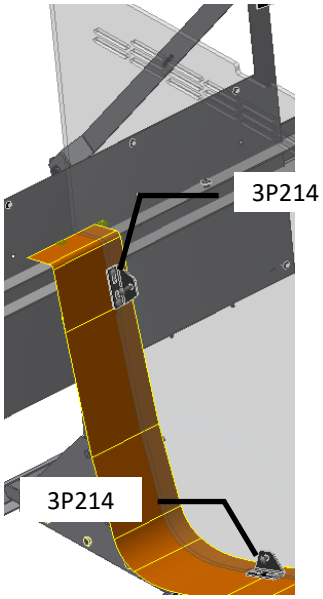

Fig. 3—DIVIDER SEAT BRACKETS

IX. Install Seat and Seat Belt

A. Follow Step V. of OSB Seat and Seat Belt instructions (4OSBK6718) to install seat belts and re-install seat.

X. Install Center Divider

A. Install divider by bringing in top first from the passenger side. Slide the divider toward the center of vehicle and locate against installed brackets. Drill and fasten using (3X61) bolts and (3X16Z) nuts.

Installation Complete!
